

U.S Environmental Protection Agency

Computer Tools for Finding and Mapping Data

Friday, April 15
GEF2 in G09
11:45 to 12:30

Learn about two computer tools available from the U.S. Environmental Protection Agency (EPA). **Window to My Environment** improves access to useful community-based environmental information and lends support to community-based decision making. **EnviroMapper for Water** is a web-based mapping interface to EPA geospatial data. Presented by R. Chris Welch.
